

Red Hawk Pressure Testers Ltd.

Red Hawk Pressure Testers Ltd. is an industry leader in pressure services. Providing first-class customer service is a top priority for our company. With our exceptional safety program, continually developed and implemented from all levels within the organization, we are confident in our ability to deliver what we promise. Red Hawk Pressure Testers Ltd. exceeds federal and provincial legislation and holds a current Certificate of Recognition (COR) in Alberta. Founded in 1994 by the late Allen Crawford, this family business has been a service provider in the oil & gas industry for over 19 years!

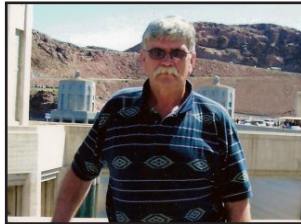

Since 99% of all pressure testing completed is done on our clients' sites, there are numerous working conditions with multitudes of possible hazards. Each and every job is unique.

It is important to maintain consistency in all job tasks while implementing them safely. ISNetworld has provided tools to help us monitor any industry changes that may impact our HSE Manual and Processes/Procedures. If an Owner Client is requesting additional information or changing their safety requirements, we are immediately notified, giving us adequate time to implement those changes and providing us with resources to clarify what is being requested.

This in turn, allows for and builds a stronger relationship with our clients.

"Maintaining our ISNetworld account at 100% is a must. The convenience for both our clients and ourselves to quickly retrieve company safety documentation, statistics, etc. is extremely valuable. We feel strongly that the confidence this organizational method provides trickles down our entire corporation and is instilled in everything we do." - General Manager, Blake Crawford

"ISNetworld has played an instrumental role in improving our business developments. At a glance we are able to confirm alignment with our clients' safety requirements. This offers us a fantastic tool to ensure our business continues in the right direction - safely meeting our clients needs!" - Business Manager, Dallas Crawford

"Accountability, reliability, constant observation and review... these are the fundamentals of our safety program and they directly correlate with the ISNetworld program. The constant training and updating of processes and requirements, that ISNetworld provides, have given us inspiration to implement the same within our organization. Safety is constantly evolving and the ISNetworld program leads the way." - HSE Administrator, Pamela Crawford

Fulfilling a Service need may be what brought us and our clients to ISNetworld but it is our common goal of "Safety First" that keeps us together.
